ROSEN JCC LEARNING CENTER

Threes Learning Curriculum

Building confident readers, thinkers, and problem-solvers — one meaningful connection at a time.

FEATURED CURRICULUM

Building Language for Literacy® — Level II

This curriculum prepares children today for reading success tomorrow, grounded in research on early literacy development.

It features warm, endearing characters who inspire and motivate learning, building on children's home and community experiences to create meaningful connections.

Building Language for Literacy also introduces math, science, and social skills in a natural sequence — nourishing learning one step at a time, with individual attention suited to your child's unique needs.

RESEARCH-BASED GOALS

1. Children have daily opportunities to use language expressively and functionally through stories, dramatic play, props, pictures, vocabulary cards, and learning-center activities.
2. Children develop an awareness of patterns and differences in the sounds of language through phonological-awareness activities involving rhyme, song, poetry, and rhythm.
3. Children identify letters and make connections between letters and sounds through experiences with literature, games, and activities.
4. Children are exposed to different kinds of print and literature genres, learning that print carries a message and recognizing the sequence and flow of stories.

ALSO EVERY DAY

Math Exploration

Children learn math through daily routines and activities. Early math concepts include counting, recognizing numbers, one-to-one correspondence, shapes, measuring, and patterning — woven into everyday moments so children build their own math connections.
